# Witches ~ Potions For Sale From Just Jodie the Brewing Otherworldly Witch

Listen carefully and I will tell you how to make your own spells and potions kit

Use any small used jam jars or spice jars and wash off the labels. Refill with things from around your kitchen and bathroom (Don't use liquid unless you like mess!). Everything I used would be safe if eaten or touched, think herbs, cocoa powder, icing sugar, sprinkles, etc especially things that smell nice (or horrible!) and things that will react when added to liquid like bicarb or popping candy for real potion effects.

There are free potion label pintables online you can print, cut out and glue on. Finally try aging your bottles by spraying with a little brown and silver spray paint or mixing some acrylic paint with a little water and painting that on for an older magical feel.

Now I've told you  
all my secrets GO!!!

Have a spooky  
HALLOWEEN

# Paper Mâché Spiders and Bats

Bewitching Beau (4)  
And  
Beguiling Bella (6)  
Have been hard at  
work AGAIN

We painted some  
paper mâché  
spiders and bats  
yesterday and  
finished off with  
glow in the dark  
paint to make  
them extra  
creepy

- Tin Foil
- Strips of paper (newspaper or tissue work well)
- Glue
- Spreader or Brush
- Masking Tape
- Paint

1. First, make a bat or spider shape with the tin foil and then use masking tape to make the model more secure. (You could buy a paper mâché bat or spider and skip these next steps and go straight onto the painting).
2. Next, start to wrap the shape with the strips of paper using lots of glue.
3. Continue adding the paper strips until all the foil is covered.
4. While the glue is still wet, reshape the model until you are happy with how it looks.
5. Leave your model to dry.
6. Once dry, paint your model.

**For a final touch - use some glow in the dark paint to give a really spooky effect.**
