

Make Your Own Exploding Paint

You will need:

- Washing up liquid
- Vinegar
- Small bowls or containers
- Paints
- Baking soda
- A tray

Method:

1. Half fill small containers with warm water. Mix in a spoonful of baking soda and stir.
2. Add a good squirt of washing up liquid and a little bit of paint into the container and once again give it a stir.
3. Fill another container in the same way with a different coloured paint.
4. Put the containers onto the tray.
5. Squirt in some vinegar into each container.
6. STAND BACK AND WATCH!!!!

See what happens when the colours mix.

Try adding the paint to the vinegar instead of the water and baking powder.

Can you create a rainbow effect?
